

SUSTAINABILITY REPORT

2024

GLOBAL GOALS

Sustainable Tourism and the 17 Sustainable Development Goals

Sustainable Development Goals (SDGs) or Global Goals represent a comprehensive development agenda aimed at being achieved by 2030. They focus on ending extreme poverty, combating inequality and injustice, and addressing climate change. The goals consist of a total of 17 integrated targets.

Reporting on the SDGs allows a company to communicate its commitment to contributing to the Global Goals to its stakeholders, demonstrate the extent to which it has achieved the set targets, and establish a foundation for measuring sustainability performance and continuous improvement principles.

SUSTAINABILITY POLICY

Barut Hotels focuses on people, nature, the environment, culture, and art, implementing various projects.

To standardize the group's sustainability efforts, there is an environmental committee that meets regularly, known as the **We Care All Committee**. This committee includes the quality department managers, energy management experts, and members of the marketing and corporate communications departments from each hotel. This multidisciplinary approach helps develop strategies to implement sustainability principles in line with goals such as reducing environmental impacts, increasing energy efficiency, and empowering local communities.

Barut Hotels is committed to not only providing quality service to its guests but also to contributing to the environment and society.

BARUT HOTELS POLICY

Our primary goal at the hotels is to provide the highest quality service by prioritizing guest satisfaction above all else. In line with this goal:

Employee Safety and Investment in People

Our personnel are our most valuable asset. We continuously improve all our processes and keep up with the latest technologies to minimize risks that could jeopardize the health and safety of our employees and partners, as well as to prevent workplace accidents. Training our employees, protecting human rights, and ensuring equal rights regardless of religion, language, or race are our non-negotiable principles.

Guest Satisfaction – Guest Safety – Guest Orientation

Our guests are the reason for our existence. Tracking all guest complaints from any source, resolving these complaints, and informing our guests to turn complaints into opportunities are our top priorities.

Respect for the Environment

One of our main goals is to prevent environmental pollution and protect nature by using our resources as efficiently as possible, reducing the amount of our waste, and ensuring recycling or making waste harmless.

Energy Management and Conservation

As Barut Hotels, we prioritize using our energy resources efficiently, monitoring and recording our energy consumption data through technological investments, and continuously improving energy efficiency by reviewing our performance indicators and targets. By adopting an environmentally friendly hotel approach in all our services and activities, we engage in energy efficiency projects and designs that will increase the use of renewable energy sources to reduce greenhouse gas emissions. Meeting all the requirements of the energy management system is considered one of our primary responsibilities to ensure its sustainability.

BARUT HOTELS POLICY

Food Safety & Hygiene

Our common principle is to implement and continuously improve the food safety system throughout the food chain to provide quality products that comply with food safety standards, while prioritizing hygiene conditions across all hotels.

Our Investors and Business Partners

We strive to identify the expectations and requirements of our investors, who provide a peaceful and safe working environment for their employees, and our business partners with whom we share the same goals, in order to provide better service than our competitors at the most suitable cost.

Child Abuse and Harassment

We believe that everyone has a responsibility to protect children. We recognize that the welfare of children and the protection of all children from any form of harm is extremely important, and it is our fundamental duty to safeguard the physical and mental well-being of all children we are involved with. In light of these principles, our hotels, competing in national and international markets, consistently demonstrate the determination needed to be leaders, continually improving and providing the necessary resources.

Support for the Local Economy

Purchasing Practices:

We are aware of our contribution to the local economy; therefore, 95% of our suppliers and raw materials are local. For sustainable tourism, we engage in environmentally friendly purchasing that produces less energy, water, and waste. In light of these principles, our hotels, competing in national and international markets, consistently demonstrate the determination needed to be leaders, continually improving and providing the necessary resources.

We respect the environment and the World to be esteemed globally...

Barut Hotels aims to control the amounts of water, electricity, energy, chemicals, and solid waste without compromising the comfort of its guests, while minimizing potential harm to the environment and natural resources. In line with sustainable tourism principles, measures have been taken to reduce the use of natural resources, and practices have been updated to minimize and, where possible, eliminate damage to soil, water, and air.

OUR CERTIFICATES

GSTC Certification Code: GSTC HACUTR240292

Sustainable Tourism CERTIFICATION

This certification recommended by Türkiye Tourism Promotion and Development Agency is issued by Control Union Certifications B.V.

Control Union Certifications B.V. is accredited by GSTC and its accreditation coverage is published at www.gstccouncil.org

ANDA BARUT COLLECTION

Based on an audit according to the requirements stated in the Türkiye Sustainable Tourism Standard, Version 1.0, 19 May 2022, which is Recognized by GSTC and a signed contract, Control Union Certifications herewith certifies that the facility listed above is found to be in compliance with Türkiye Sustainable Tourism Standard, Version, 1.0 19 May 2022. This guarantees that the criteria for managing Sustainable Tourism certified tourism services have been met.

Certification Number: **CU-ST-AN-1046**
Date of First Certification: **30 / 09 / 2024**
Issued On: **30 / 09 / 2024**
Date of Expiry: **29 / 09 / 2025**

HEALTH AND SAFETY

3rd Eye Inspections

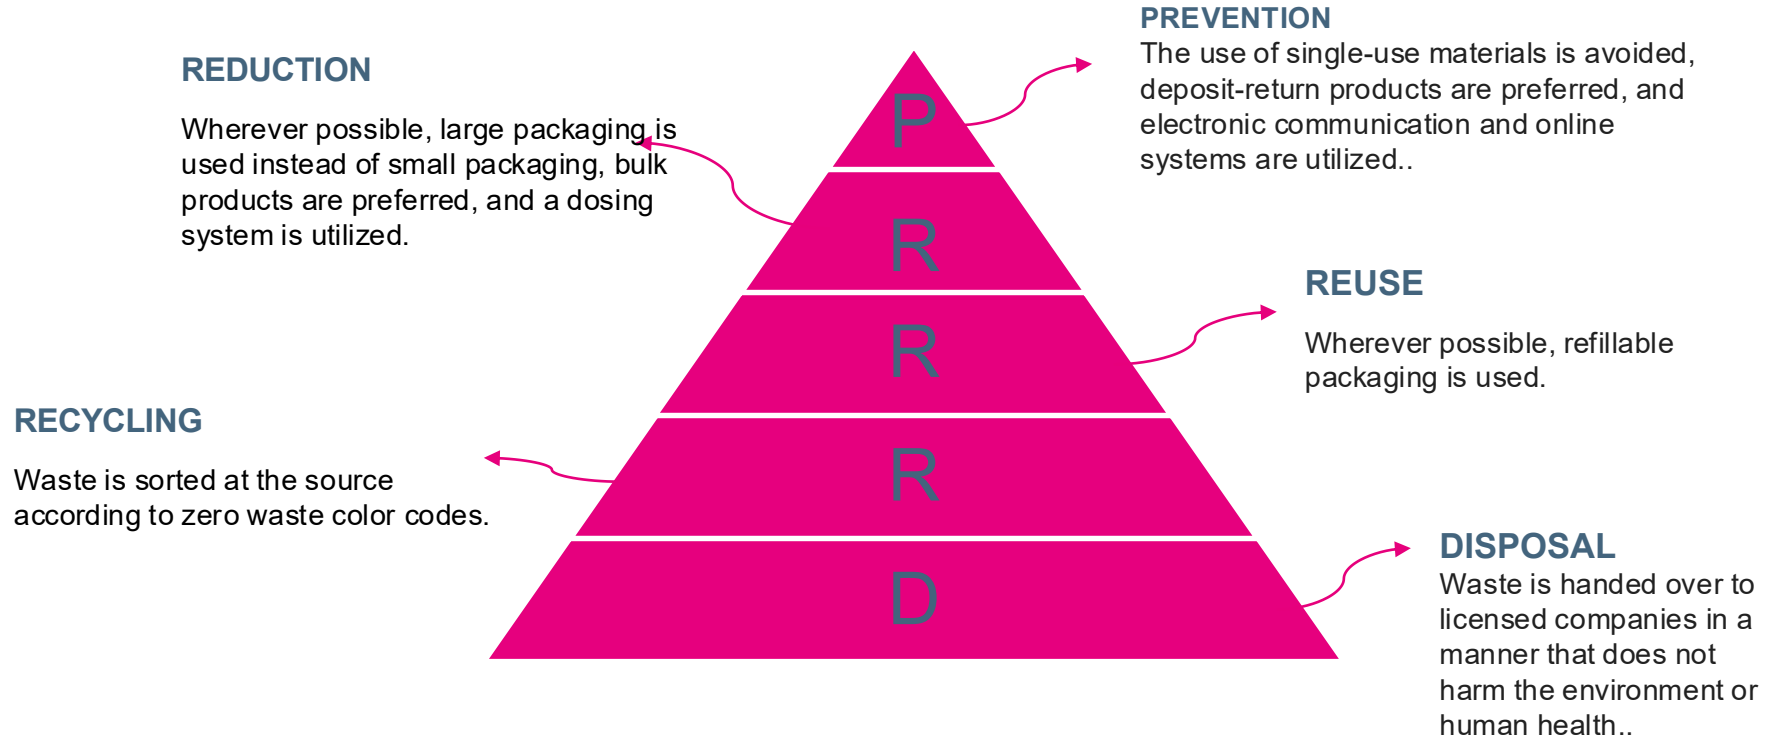

WASTE MANAGEMENT

Our Waste Management Practices

- Our staff receives ongoing training on waste awareness.
- We collaborate with Didim Municipality's "Can Dostlar İçin Mama Fabrikası" (Food Factory for Animal Friends) to send organic waste generated at our facility to the factory under the zero waste slogan for animal feed.
- To reduce plastic waste, we primarily use large-volume water containers at our facility. In areas where small packaged water is necessary, we prefer glass bottles.
- Recycling bins are available in all areas, and we encourage our employees and guests to participate in recycling.
- We use environmentally friendly hotel key cards, eliminating the use of PVC with sustainable key cards.
- We implement sustainable menu practices, creating QR codes in service areas that allow our guests to manage food and beverage orders, thereby reducing waste consumption.
- Products such as shampoo and shower gel in rooms are chosen in large packaging to minimize waste.
- We aim to prevent plastic use by using paper straws.

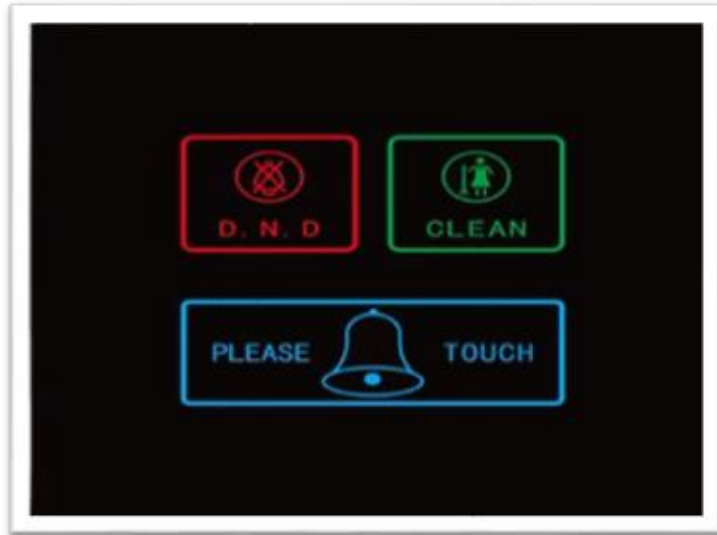

WASTE MANAGEMENT HIERARCHY

WASTE MANAGEMENT

DND Room KeyCard Systems

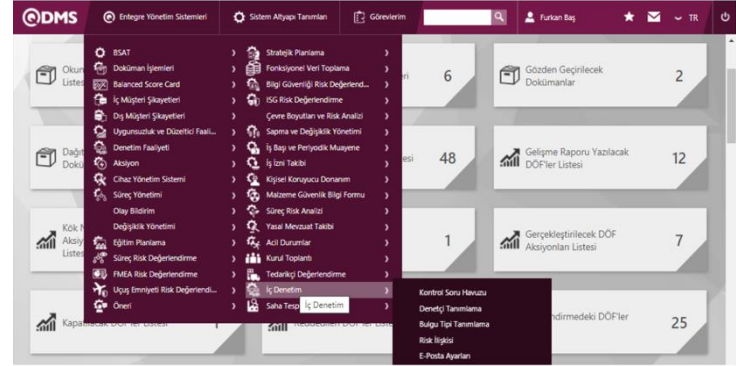

We utilize digital DND (Do Not Disturb) systems in our facility to minimize waste production. With this system, we prevent an average of 56 kg of plastic waste from being generated each year.

WASTE MANAGEMENT

Digital Document Management System

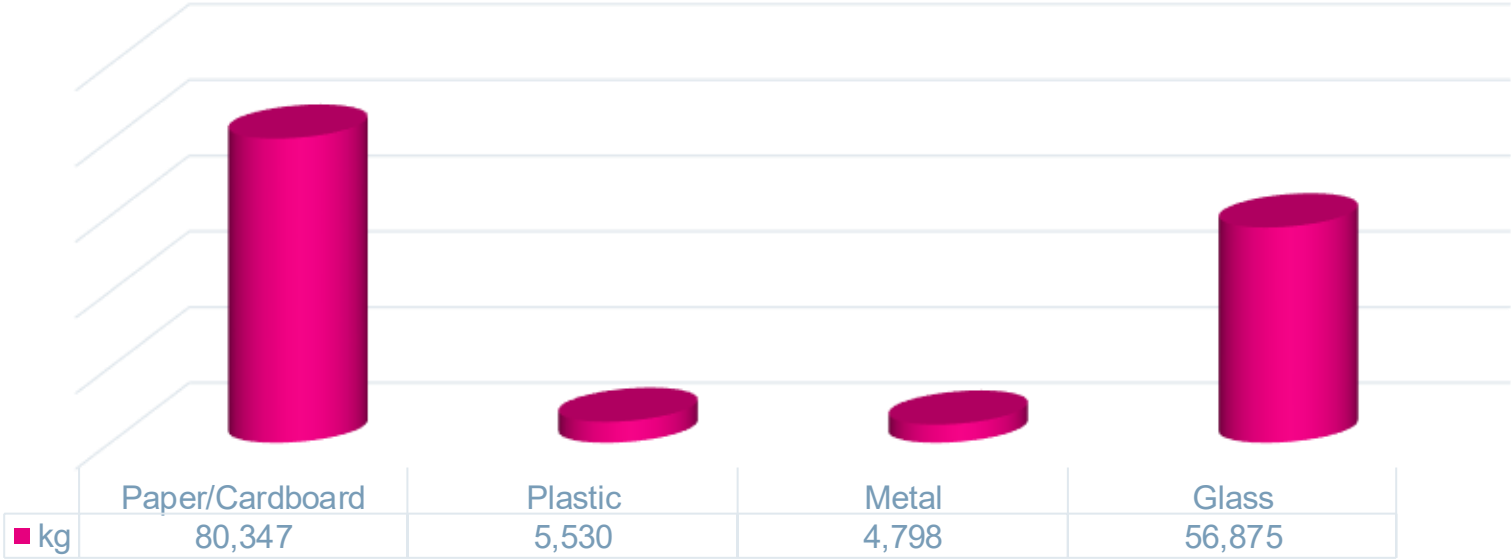

- Minimize paper usage to reduce natural resource consumption.
- Save time by accessing desired information more quickly.
- Transfer data from documents to digital format, creating a database and transforming it into processable data.

1436 documents are being tracked through the digital portal.

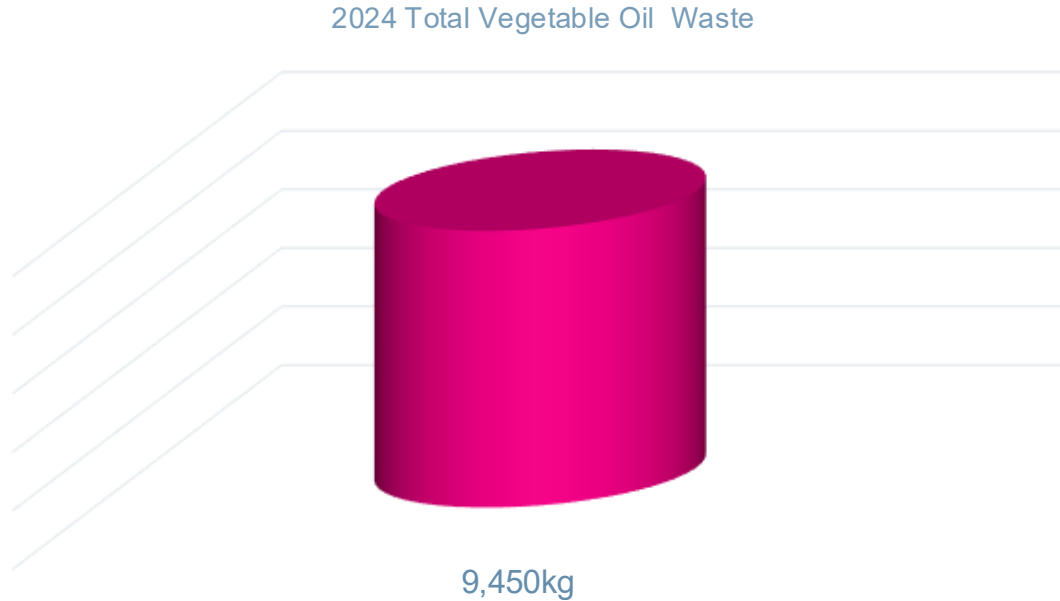

WASTE MANAGEMENT

Recyclable Waste

WASTE MANAGEMENT

Vegetable Oil Waste

OUR WASTE SEPARATIONS

In our facility, a special temporary waste storage area has been created to ensure the safe and organized storage of waste. In this area, there are different storage units separated according to the types of waste:

- Two cold rooms are used to prevent the decomposition of organic waste and to ensure safe storage for health reasons. For hazardous waste, vegetable oil waste, and glass waste, there are rooms designed specifically for each type.
- These rooms ensure the safe storage of waste without harming the environment. Separate containers have been placed for recyclable waste (paper, plastic, metal).
- This facilitates the recycling of these materials and reduces their environmental impact.

This waste storage system adopts an environmentally friendly approach, aiming to both optimize waste management and increase recycling rates.

ENERGY MANAGEMENT

Our Energy Management Practices

- In the context of a green building, sustainable material selection was prioritized during the construction phase of our facility, and 20% of the building structure is made from stones sourced from the site. Insulation has been used in all of our buildings.
- In this context, factors such as resource efficiency, environmental impact, and indoor air quality have been addressed.
- We have rooftop gardens for a green atmosphere, and we strive to balance our carbon footprint.
- Smart building technologies have been implemented. Our rooms are equipped with air conditioning and occupancy sensors, enabling energy management. A digital DND (Do Not Disturb) system is used, and waste production has been minimized.
- To reduce our carbon footprint, the pools in our facility are heated with heat pumps, contributing to energy conservation.
- We provide bicycles in guest areas, helping to reduce our carbon footprint. Our facility uses 100% LED lighting, which allows us to consume less energy.
- We have two electric vehicle charging stations in our facility, encouraging both guests and employees to reduce their environmental impact.

ENERGY MANAGEMENT

Energy Sources

Anda Barut Collection is a high-capacity facility where a variety of energy sources and technologies are used together. Energy data is recorded through various methods and is regularly reported. It is monitored through operational and financial analyses. The lighting, climate control, irrigation, and other automation systems in use create opportunities for savings. By sourcing efficient, cost-saving, environmentally friendly, and new technology products, the goal is to have a positive impact on energy values.

The energy sources used in our facility are listed below:

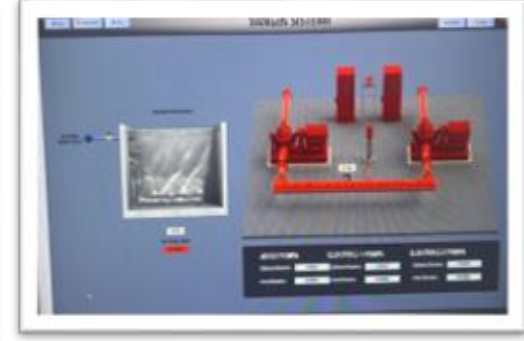

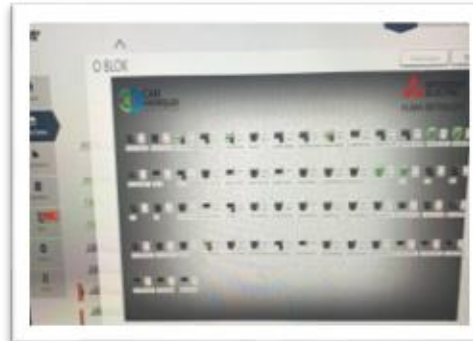

- Electricity
- LNG (Liquefied Natural Gas)
- Diesel fuel
- Gasoline
- LPG (Liquefied Petroleum Gas)
- Coal

ENERGY MANAGEMENT

Automation Systems

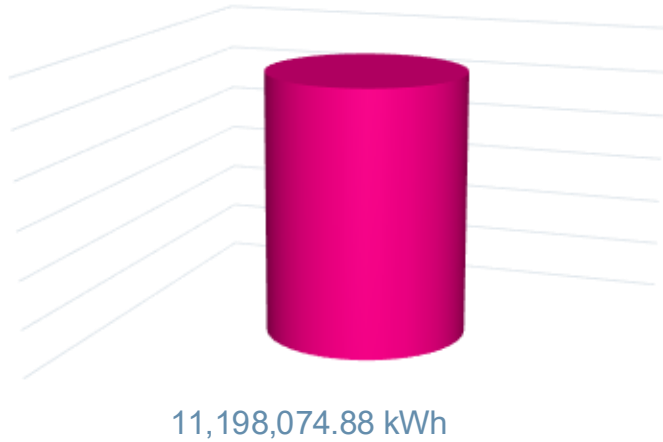

In our facility, automation systems are used to ensure effective management and control in various areas. **Climate Control Systems:** Automation solutions that optimize indoor temperature and humidity levels. **Pool Water Management:** Regular monitoring and control of the quality and temperature of pool water. **Garden Irrigation:** Garden irrigation processes are automatically controlled to prevent water waste. **Fire Detection and Suppression Systems:** Automation systems are used for early detection and quick intervention to ensure fire safety. **Cold Storage:** Monitoring the temperature and humidity levels in cold storage areas and making automatic adjustments when necessary. These automation systems play a crucial role in increasing the facility's efficiency and ensuring energy savings.

WATER MANAGEMENT

Our Water Management Practices

- Our facility is equipped with a reverse osmosis system. Seawater is used to produce utility water, minimizing the need for freshwater resources.
- We conduct domestic wastewater recycling in our facility. The wastewater is treated in our biological treatment plant and used for garden irrigation, reducing our dependence on water resources.
- In plant selection, we have chosen approximately 85% drought-resistant plants, reducing water consumption.
- We use water-efficient technologies. In garden irrigation, sprinkler and drip systems are used to ensure water is used consciously.
- We use environmentally friendly smart planters, which help prevent unnecessary water consumption and contribute to water savings.
- We are developing water management plans to reduce water consumption. For water-efficient usage, washing machines and dishwashers are used for full-load cycles.
- Rainwater harvesting is implemented in our facility. By collecting rainwater, we aim to reduce our dependence on water resources for irrigation.
- We offer guests the option to reuse their bed linens, contributing to water savings.
- Sensor faucets are used in public areas, helping to reduce water consumption.

WATER MANAGEMENT

Garden Irrigation Systems

The irrigation of green areas throughout the facility is carried out with timer-controlled automation programs. This ensures that water resources are used correctly, preventing excessive use.

WATER MANAGEMENT

Our Water Management Practices

We offer our guests the option to reuse their bed linens with a wooden linen change card, minimizing water consumption. This practice promotes water savings by adopting an environmentally friendly approach.

Chemical Usage

Our Projects Related to Chemical Usage

Anda Barut Collection Hotel places great importance on sustainability practices regarding chemical usage. Focused on protecting both the health of its guests and the environment, the hotel is committed to the conscious use of chemicals. Environmentally friendly and health-conscious cleaning products are preferred in the selection of cleaning agents.

Our Applications Related to Chemical Usage:

Chemical Consumption Monitoring: We regularly track our daily chemical consumption to reduce chemical usage.

Concentrated Products for Room Cleaning: For room cleaning, we prefer concentrated cleaning products to support environmentally friendly and efficient use, and we use a dosing system.

Shampoo and Soap Usage: In guest rooms, the use of liquid shampoo and soap is being increased instead of single-use products.

Guest Amenities and Packaging Waste: We aim to minimize the use of guest amenities and the packaging waste generated by these items in guest rooms.

Pool Chemical Management: In our pools, automatic chemical dosing systems are used to ensure hygienic practices are applied correctly and effectively.

Pest Control Safety: We meticulously check the chemicals used by the external pest control company to ensure they are non-harmful to human health and the environment.

Chemical Waste Management: We work with authorized firms to safely dispose of chemicals and track the disposal of chemical waste.

CHEMICAL MANAGEMENT

Automation Systems

The chemicals used in **the Pool Water, Laundry, F&B, and Stewarding areas** are applied in a controlled manner through automatic dosing systems. With this system, the chemical consumption of each unit can be monitored and optimized.

We Are Reducing Our Carbon Footprint

Bicycle Usage

With 14 bicycles available for use in guest areas, we offer an eco-friendly mode of transportation and provide guests with the opportunity to explore the hotel. Cycling also promotes physical activity, contributing to health and fitness. Using bicycles at our facility brings both fun and a sustainable accommodation experience.

Cuisine Queens Event

Anda Barut Collection highlights the power of women in gastronomy with "Cuisine Queens."

The Role of Female Employees is Growing at Anda Barut Collection

Anda Barut Collection, with the support of female chefs and female staff, demonstrates a commitment to gender equality in the tourism industry. With a total of 896 employees, Anda Barut Collection has 291 female staff members. In the kitchen team, there are 171 people, 46 of whom are women. The main goal is to achieve gender balance in all departments, with an initial aim of reaching a 40% female - 60% male workforce at Anda Barut Collection. The "Cuisine Queens" event has been organized to highlight the power and creativity of female chefs in gastronomy.

TRAININGS

Carbon Footprint Training

On July 17-18, 2024, the Carbon Footprint Green Deal Training will be held with the participation of all quality managers. The aim of the training is to increase awareness of climate change among individuals and communities and to encourage the adoption of a sustainable lifestyle. The training will teach what a carbon footprint is, how it is calculated, and how it can be reduced. In this way, energy consumption, transportation habits, and waste management will be reviewed to guide participants in reducing their environmental impact.

Trainings Provided to Our Employees

- Food Safety Rules
- Behavioral Standards
- Efficient Use of Natural Gas
- Guest Laundry Training
- Dry Cleaning Usage Instructions
- Irrigation Systems
- General Area Cleaning Rules
- Guest Feedback Evaluation
- Rules for Disposal
- Orientation Training
- Environmental Cleaning
- Child Protection Rights
- Water and Food Waste
- Women's Rights
- Oil Separator Cleaning
- Carbon Footprint
- First Aid

- Vegetable and Fruit Washing
- Chemical Usage
- Waste Segregation
- Information on Waste Room
- Waste Bag Color Coding
- Cleaning Cloth Color Codes
- Waste Separation
- Water Conservation
- Guest Satisfaction
- Quality Information Training
- Hygiene Training
- Employee Behavioral Standards
- Child Abuse
- Hazardous Waste Information
- Safe and Efficient Use of Electrical Appliances
- Addiction Prevention Training

BAND UP

Band Up Employee Application

Band Tourism and Trade Inc. has developed an application specifically for its employees.

Our Goal:

- To ensure that our internal communication network is fast and efficient.
- To allow our employees to provide real-time feedback and suggestions.
- To enable employees to complete and review all General and Departmental Trainings before starting work.
- To ensure that our Handbooks and standards are always available in a location accessible to our employees (these will be included in the system under job descriptions).T
- o make it easy for employees to access updated service routes and stops through the system.

Environmental Education Activities Conducted in 2024

	Event Name	Date	Brief summary evaluation of the conducted training activity
1	Beach Cleaning Event	05.06.2024	On Environment Day, a waste collection event was organized with our volunteer staff at Altinkum Beach, the longest beach area in Didim.
2	Environmental Themed Painting and Flower Planting Event	05.06.2024	A day themed 'Environmental Awareness, Protect Nature' was spent with our young guests.
3	Planting Seed Balls in the Soil	March-May2024	In its fifth year, Barut Hotels' We Care All Sustainability Awareness initiative has brought 5,000 seed balls together with the soil in the Muğla region. On the occasion of Forest Week, the seeds introduced to nature were scattered at intervals between March and May in areas determined by e-cording and the General Directorate of Forestry.
4	Discover Didim with National Geographic	22-23-24.05.2024	The historical beauties and nature of Didim were explored through a National Geographic event. Bafa Lake, the Temple of Apollo, and the Ancient City of Milet were visited with Emrah Sefa Gürkan and Rena Effendi.
5	Compost and Seed Workshop Event with National Geographic	22.06.2024	A compost and seed workshop event was held with children by National Geographic and Kokopelli in the city. The children were taught how to recycle organic waste and how to adopt sustainable habits.
6	Recycling Workshop	12.07.2024	In the recycling workshop with children, clothes and toys were designed, and awareness was raised about the importance of recycling.
7	Nature Conservation Themed Painting and Coloring Event	02.08.2024	A 'Protect Nature' themed painting and coloring event was held with children.

Environmental Education Activities Conducted in 2024

	Event Name	Date	Brief summary evaluation of the conducted training activity
8	Sea Cleaning	20.08.2024	Together with our volunteer staff, we cleaned our beaches and seas. We repeat this event at regular intervals.
9	Tree Donation	30.08.2024	The Environmental Protection Social Assistance and Cultural Services donated 230 tree saplings.
10	Trip to the Didim Nature and Animal Protection Association	08.10.2024	Together with our volunteer staff, we visited the Didim Nature and Animal Protection Association and discussed potential projects we could collaborate on with the association.
11	Orientation Trainings	Monthly	In the orientation trainings, all our staff working within the hotel are provided with education on topics such as the environment, sustainable tourism, and waste segregation.
12	Environmental Awareness Trainings	Monthly	Our Environmental Engineer regularly provides awareness training to our employees on the importance of the environment and waste segregation.
13	Sending Food Waste to the Didim Municipality Animal Feed Factory	Regularly	As part of the Zero Waste Project of the Didim Municipality Animal Feed Factory, our food waste is regularly provided to produce animal feed for the animals in the shelter.

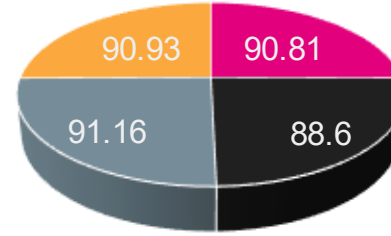

GUEST SURVEYS

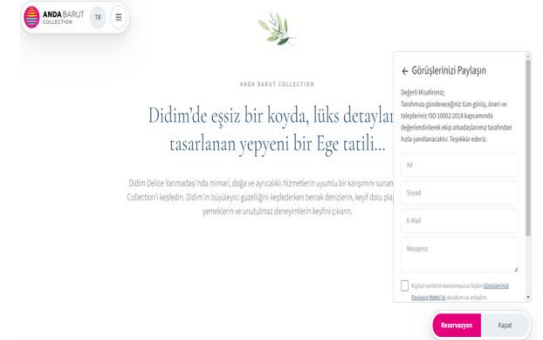

We include 4 questions related to the environment and sustainability in our guest surveys.

1. The hotel's environmental consciousness and commitment to sustainability affect my choice of hotel.
2. I have sufficient information about the hotel's environmental and sustainability practices.
3. I believe the hotel's operations support environmental protection and sustainability.
4. I believe I contribute to the hotel's environmental and sustainability practices during my stay.

2024 Sustainability Survey Questions Ratio

- 1st Question
- 2nd Question
- 3rd Question
- 4th Question

Accessible Vacation

Our accessible pool lifts are wheelchair-friendly, providing easy access to the pool at any desired location. The wheels rotate in all directions, have a brake system, and the tires are fixed with a high stabilization system, preventing any risk of slipping during lowering or lifting. Safety is a priority for us, with seat belts and non-slip seating surfaces ensuring security. Our pool lifts are designed ergonomically, ensuring comfort and ease of use for our guests. The simple control system allows guests to use the lift comfortably without needing a second person. Additionally, the lift distance, pool depth, and the system are adjustable to suit individual needs. Floating loungers allow easy access to the sea for physically disabled and elderly guests who have difficulty walking. We aim to support disabled guests in overcoming their disadvantageous situation, ensuring they are not excluded and can develop both personally and socially within the community. Furthermore, this season, we will introduce an emergency button for hearing-impaired guests to use during sea activities. The device is practical, with a small button worn around the neck that sends a signal in case of an emergency, alerting the lifeguard's wristband and protecting the guest from potential dangers.

ART EVENTS

Anda Barut Collection has signed an exclusive partnership with Snob Collector, established under the Pg Art Gallery, which holds an important place in Turkey's contemporary art scene. This exciting collaboration redefines the concept of vacation by offering hotel guests a unique art experience. Snob Collector has started welcoming its guests at Anda Barut Collection.

PROTECTING THE ANIMALS AND THE NATURE

Trip to the Didim Nature and Animal Protection Association

Together with our volunteer staff, we visited the Didim Nature and Animal Protection Association and discussed potential projects we could collaborate on with the association.

ENVIRONMENTAL ACTIVITIES

Recycling Workshop

A recycling event was organized with children. Toys were made from plastic bottles, masks from plates, and costumes from bags. The importance of recycling was demonstrated to the children, and its significance was emphasized.

ENVIRONMENTAL ACTIVITIES

Compost and Seed Workshop with National Geographic

A Compost and Seed Workshop event was held with children at our mini club in collaboration with National Geographic and Kokopelli Şehirde. The children were taught how to recycle organic waste and how to adopt sustainable habits.

ENVIRONMENTAL ACTIVITIES

Compost and Seed Workshop with National Geographic

A Compost and Seed Workshop event was held with children at our mini club in collaboration with National Geographic and Kokopelli Şehirde. The children were taught how to recycle organic waste and how to adopt sustainable habits.

ENVIRONMENTAL ACTIVITIES

Protect the Nature-Themed Painting and Coloring Event

Protect the Nature-themed painting and coloring event was held with children in the mini club. Awareness about nature was raised during the activity.

ENVIRONMENTAL ACTIVITIES

Sea Cleanup

We cleaned our beaches and seas together with our volunteer employees. We repeat this event at regular intervals.

ENVIRONMENTAL ACTIVITIES

Environmental-Themed Painting and Flower Planting Event

On June 5th, World Environment Day, we held an awareness-raising and painting event related to environmental issues with our young guests. In our hotel garden, we organized a flower and seed planting activity with the children. The plants were named, creating a memory garden.

ENVIRONMENTAL ACTIVITIES

Environmental-Themed Painting and Flower Planting Event

ENVIRONMENTAL ACTIVITIES

Beach Cleanup Event

On June 5th, World Environment Day, our volunteer employees collected waste from Altinkum Beach, the longest beach in Didim. With the participation of the public, it became a highly awareness-raising event.

REDUCTION OF ENVIRONMENTAL IMPACTS

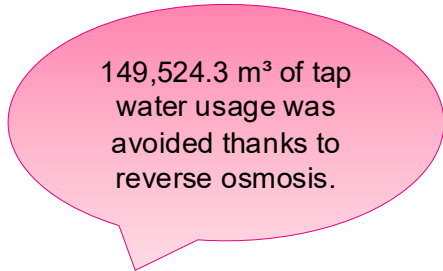

Water and Wastewater Management

In our facility, both tap water and reverse osmosis water are used, and there is an active and monitored conditioning system in place. The water distributed throughout the facility from our water lines is of drinking water quality and is monitored through daily, weekly, and monthly measurements and analyses. Water consumption in the system is recorded through meters and processed into consumption reports.

Additionally, wastewater in our facility is converted into irrigation water for the gardens using a treatment system.

62,110 m³ of Domestic Wastewater was used for garden irrigation.

149,524.3 m³ of tap water usage was avoided thanks to reverse osmosis.

REDUCTION OF ENVIRONMENTAL IMPACTS

Electric Vehicles and Charging Facilities

As Barut Collection, we support the reduction of environmental impacts by promoting the use of electric vehicles. To this end, we offer our guests the option of an Electric Vehicle Charging Station at our facility and use electric buggies for transportation within the premises.

REDUCTION OF ENVIRONMENTAL IMPACTS

Contribution to the Region's Commercial Volume

We pay special attention to working with suppliers located in the nearby areas at our facility. The volume of guests and employees at our hotel creates a potential workforce for the region, contributing to an increase in the local population. Employing workers from nearby towns, districts, and provinces also supports the economic development of the region.

SOCIAL RESPONSIBILITY- ENVIRONMENTAL MOVEMENT

Excess Food - Food Waste Management

What We Are Doing to Reduce Food Waste

- Menu Planning
- Waste Measurement
- Evaluation in the Employee Canteen
- Waste Separation
- Researching New Technologies (such as animal feed)
- Awareness-raising activities to increase the awareness of employees and guests.

SOCIAL RESPONSIBILITY- ENVIRONMENTAL MOVEMENT

Breast Cancer Awareness Month

Due to Breast Cancer Awareness Month from October 1 to 31, we conducted a "Breast Cancer Awareness Training" in collaboration with our partner, Egemed Hospital, to raise awareness among our employees.

SOCIAL RESPONSIBILITY- ENVIRONMENTAL MOVEMENT

Support for Afforestation Efforts

In the 5th year of WE CARE ALL, 5,000 red pine and black pine seed balls were introduced to the soil in Muğla between March 1 and May 5. The seed balls, prepared by seven women, were dispersed into nature by ecoDrones over a distance of 7.2 kilometers.

CULTURAL HERITAGE

Protection and Promotion of Natural, Cultural, and Historical Heritage

In the location of our facility, we provide valuable information to our esteemed guests through our website regarding the natural, historical, touristic, and archaeological riches, traditions of the local people, unique characteristics of the region, nearby excursions, as well as sports and cultural activities.
